

Hosted Email & Web Protection

Protection, Security, and Archiving

Managed email plans using MX Logic (McAfee SaaS). Including email protection, security, archiving, fail safe protection, etc.

MX Logic Master Reseller

Email is today's engine of productivity. That's why your business needs effective and reliable email protection. McAfee SaaS Email Protection and Continuity is a cloud-based solution that blocks more than 99% of spam, viruses, and fraudulent messages, before they enter your network. It also enforces your policies on outgoing mail, both in the email body and in attachments. In case of a planned or unplanned outage, this service enables web-based email access, management, and use.

Prestwood IT, Master-Level Certified Reseller

Prestwood IT maintains a master-level certification (highest level) which allows us to be a top-level tech partner with MX Logic.
